EDUCATION

University of Washington Seattle

Seattle, WA

Bachelor of Science in Informatics, Minor in Mathematics, 3.87 GPA

2011 – 2014

DigiPen Institute of Technology

Redmond, WA

Towards overall degree at University of Washington, 4.00 GPA

2009 – 2011

Bellevue College

Bellevue, WA

Towards overall degree at University of Washington, 4.00 GPA

2008 – 2011

EXPERIENCE

Senior Software Engineer

Jan. 2024 – Nov. 2024

Hewlett Packard Enterprise

Remote

- Worked across the stack on a greenfield RAG evaluation and deployment service which primarily used Go, Python, and TypeScript React.
- Lead the RAG evaluation React frontend project. Evaluation streamed DeepEval results in real-time with WebSockets to help compare RAG output to what was expected.
- Helped define the frontend architecture into core components reused across the app with tools like vite, eslint, axe, storybook, orval, zod, msw, jest, and playwright.
- Implemented performance critical features in a JupyterLab extension for managing large data-driven pipelines training LLMs.
- Worked closely with product managers and designers to deliver stories sometimes requiring presentations to stakeholders and technical design documents.

Principal Software Engineer

Feb. 2021 – Apr. 2023

Devoted Health

Remote

- Remote role working with Go on the backend and TypeScript React on the frontend.
- Drafted stories for a React customer service app by participating product design meetings and developed them until release.
- Scaled ETL pipelines that had to meet the demands of fast user growth.
- Lead project redesigning the RISK engine which is the primary revenue stream enabling claim reimbursement by the US government.

Freelance Software Engineer

Aug. 2020 – Jan. 2021

Self-Employed

Remote

- Contract work building APIs and React web applications for small to mid-sized companies.
- Computer Science tutoring and classes for teaching university students web development.

Lead Senior Software Engineer

Jul. 2018 – Jul. 2020

Humble Bundle

Remote

- Promoted from Senior Software Engineer to Lead Senior Software Engineer II of the Platform team.
- Developed features for a Python and React e-commerce website that averages 26 million views per month.
- Executed a project to migrate all sessions to the newly required TOTP two-factor system with OAuth Google login.
- Led the internationalization project for an 8-year-old application and educated other developers on how to use these tools.
- Managed 5 direct reports including regular one-on-one meetings, code reviews, and pair programming.

Lead Full Stack Software Engineer

Jan. 2018 – Aug. 2018

Committee for Children

Seattle, WA

- Led the replacement of a legacy, monolithic DNN platform to a high performance platform utilizing using React and .NET Core.
- Migrated user authentication to the IdentityServer4 OpenID identity provider.
- Incrementally transformed a series of untested stored procedures into a modern C# WebAPI.
- Developed a TypeScript React frontend powered by an ASP.NET Core C# backend to track the delivery of coursework to students.

Full Stack Software Engineer

Jul. 2013 – Dec. 2017

Trov

Remote

- Remote software development team where developers wrote unit and integration tests.
- Constructed an on-demand insurance platform for consumer items with ASP.NET C# and SQL.
- Developed an app for managing claims and insuring items with a Typescript React frontend and ASP.NET C# backend.
- Built a business intelligence system for sending information to Trov's partners using Python.

Application Researcher

Jan. 2013 – Nov. 2013

University of Washington

Seattle, WA

- Lead developer for the TypeScript library that abstracted cloud storage services like Dropbox, Google Drive, and AWS.
- Contributed to a research paper on abstracting cloud storage.

Software Engineer Intern

Sept. 2012 – May 2013

E*Trade

Seattle, WA

- Worked on an international team to develop high performance stock trading apps implemented in Java
- Developed high-frequency trading features that supported options (contracts to buy a stock at a given price in a span of time).

Web Instructor and Engineer

Jan. 2012 – Jun. 2013

University of Washington

Seattle, WA

- Taught modern web development standards to University of Washington staff and students.
- Developed applications to manage courses and support tickets using Python and Django.

Software Engineer Intern

Apr. 2012 – Nov. 2012

Rakuten

Seattle, WA

- Scraped and normalized product information using Python.
- Worked with Overstock, Amazon, and Walmart APIs to gather product information and update listings.

Software Engineer Intern

Apr. 2011 – Nov. 2011

SmiteWorks

Bellevue, WA

- Worked on the FantasyGrounds chat feature using C.
- Led the development of a C app to import character data from competitors apps.
- Worked with the Steam gaming app store to publish updates and respond to customer feedback.

PROJECTS

Personal Website | *TypeScript, Next.JS, TailwindCSS, Docker, Node.js, MDX, React*

- Next.JS powered blog and resume website adhering to modern web development standards.
- High performance and no JavaScript support is enabled due to a hybrid model of server-side and client-side rendering.
- Blog using MDX files for easy maintenance and richly formatted posts.

Note Doctor | *TypeScript, Node.JS, SendGrid, Google Cloud, eslint, prettier*

- A CLI tool for triaging markdown files using front-matter headers sorted by priority, status, category, and due date.
- Sends a daily email digest of due and urgent tasks using the SendGrid Email API and Google Cloud VMs.

Discord Management Bot | *TypeScript, Node.JS, Docker, Discord.js, eslint, prettier*

- Discord bots written in TypeScript running on Node.JS for logging, music, GPT-2 chatting, role management, and security monitoring.
- Scales to a discord of any size and can be configured with JSON to support any number of discords.
- Code is broken up into highly reusable modules that can be pulled into any TypeScript project for customization.

GPT-2 API | *Python, Starlette, GPT-2, Tensorflow, Docker, Kubernetes*

- An API that allows requests against GPT-2 models to generate meaningful responses to any text prompt.

dstruct | *TypeScript, Grunt, Docker, Bower, Karma*

- Common data structures and algorithms for TypeScript.
- Based on Java collections, C# collections, and Google Java collections.

ShareTube | *TypeScript, Node.JS, Docker, React, eslint, prettier*

- Displays a video with multiple sources allowing the user to select which source is used.
- Implements a single shared comments thread across all sources for the video.

Autocomplete Comparison | *TypeScript, React, Redux, React Native, C#, Blazor*

- An implementation of the same search autocomplete similar to Google in React Native, React, and C# Blazor.

TECHNICAL SKILLS

Languages: Bash, C, C#, CSS, HTML, JavaScript, Python, SQL, TypeScript

Frameworks: ASP.NET MVC, Flask, Next.js, React, Starlette, Vue.js

Libraries: ASP.NET MVC, NumPy, pandas, PostCSS, TailwindCSS, TensorFlow

Databases: Elasticsearch, MSSQL, MySQL, PostgreSQL

Cloud Providers: Akamai, AWS, Cloudflare, DigitalOcean, Google Cloud, Microsoft Azure, Vercel

Developer Tools: cmake, Docker, ESLint, gcc, Git, Kubernetes, npm, Prettier, Visual Studio, VSCode, webpack

Operating Systems: ChromeOS, GNU/Linux, MacOS, Windows

Office Software: Apple iWork, Google Docs, LaTeX, LibreOffice, Microsoft Office

Professional Affiliations: IEEE Computer Society, IEEE Robotics and Automation Society, IEEE Communications, Association for Computing Machinery

Soft Skills: Constructive feedback, desire to listen and grow, effective concise communication, problem solving with minimal guidance
