## EDUCATION

---

<b>University of Washington Seattle</b> <i>Bachelor of Science in Informatics, Minor in Mathematics, 3.80 GPA</i>	Seattle, WA 2011 – 2014
<b>DigiPen Institute of Technology</b> <i>Towards overall degree at University of Washington, 4.00 GPA</i>	Redmond, WA 2009 – 2011
<b>Bellevue College</b> <i>Towards overall degree at University of Washington, 4.00 GPA</i>	Bellevue, WA 2008 – 2011

## EXPERIENCE

---

<b>Freelance Software Engineer</b> <i>Self-Employed</i> <ul style="list-style-type: none"><li>TypeScript Discord bots configured by JSON to manage large servers with high performance</li><li>Providing proof of concept code for several University of Washington research projects</li><li>Computer Science tutoring for college students</li><li>Teaching workshops on modern web development</li></ul>	Aug 2020 – Present Remote
<b>Lead Senior Software Engineer II</b> <i>Humble Bundle</i> <ul style="list-style-type: none"><li>Promoted from Senior Software Engineer to Lead Senior Software Engineer II over the course of my employment</li><li>Lead the platform team focused on site reliability engineering</li><li>Worked with product to define a plan to optimize the user funnel for our monthly product</li><li>Lead the internationalization project for an 8-year-old application with minimal prior internationalization efforts</li><li>Integrated an OAuth login system for Facebook and Google into our existing user system</li><li>Planned a project to migrate all sessions to the newly required email or TOTP two-factor system</li><li>Helped define standards for representing DateTimes, Money, and Percents in Python and JavaScript</li></ul>	Jul 2018 – Jul 2020 Remote
<b>Lead Full Stack Software Engineer</b> <i>Committee for Children</i> <ul style="list-style-type: none"><li>Lead replacement of a legacy monolithic DNN platform over to using React and .NET Core</li><li>Migrated user authentication to the IdentityServer4 OpenID identity provider</li><li>Incrementally rewrote a series of untested stored procedures into a modern C# WebAPI</li></ul>	Jan 2018 – Aug 2018 Seattle, WA
<b>Full Stack Software Engineer</b> <i>Trov</i> <ul style="list-style-type: none"><li>Remote software development team where developers write unit and integration tests</li><li>Constructed an on demand insurance platform for consumer items with C# and SQL</li><li>Developed an app for managing claims and insuring items with React and Angular.js</li><li>Built a business intelligence system for sending information to our partners using Python</li></ul>	Jul 2013 – Dec 2017 Remote
<b>Application Researcher</b> <i>University of Washington</i> <ul style="list-style-type: none"><li>Lead developer for a JavaScript library which abstracted cloud drive APIs like Dropbox and Google Drive</li><li>Taught staff and students to use and contribute to the library</li></ul>	Jan 2013 – Nov 2013 Seattle, WA
<b>Software Engineer Intern</b> <i>E*Trade</i> <ul style="list-style-type: none"><li>Developed Java stock trading apps with an international team</li><li>Worked on features focused on high-frequency trading and options</li></ul>	Sept 2012 – May 2013 Seattle, WA
<b>Web Instructor and Engineer</b> <i>University of Washington</i>	Jan 2012 – Jun 2013 Seattle, WA

- Taught modern web development standards to UW staff and students
- Developed Python Django applications to manage courses and support tickets

## Software Engineer Intern

Apr 2012 – Nov 2012

### Rakuten

Seattle, WA

- Scraped and normalized product information using Python
- Worked with Overstock, Amazon, and Walmart APIs to gather product information and update listings

## Software Engineer Intern

Apr 2011 – Nov 2011

### SmiteWorks

Bellevue, WA

- Worked on the FantasyGrounds chat feature using C
- Lead the development of a C app to import character data from competitors apps
- Worked with the Steam gaming app store to publish updates and respond to customer feedback

## PROJECTS

---

### Personal Website | *TypeScript, Next.JS, TailwindCSS, Docker, Node.js, MDX, React*

- Next.JS powered blog, resume, and link shortener website powering my portfolio
- Hybrid static and server rendering model for initial load performance that switches to client side rendering
- Blog using MDX files for easy maintenance and richly formatted posts

### Discord Management Bot | *TypeScript, Node.JS, Docker, Discord.js, eslint, prettier*

- Discord bots written in TypeScript for Node.JS to manage administrative functions of a feature
- Scales to any size of discord server and can be deployed via Docker on any cloud platform
- Bots are broken up by function to enable isolated permissions instead of the monolithic administrative function
- Configured with JSON and allows for separate testing and production discord
- Code is broken up into highly reusable modules that can be pulled into any TypeScript project for customization

### ShareTube | *TypeScript, Node.JS, Docker, React, eslint, prettier*

- Sharing a redundantly uploaded video across several video services
- JSON configuration of video that can be loaded via url or as a query param
- Unique chat rooms for each JSON configuration video

### GPT-2 API | *Python, Starlette, GPT-2, Tensorflow, Docker, Kubernetes*

- API that allows requests against any GPT-2 model

### Autocomplete Comparison | *TypeScript, React, Redux, React Native, C#, Blazor*

- An implementation of a search autocomplete similar Google
- Comparing React Native, React Redux, and Blazor

### dstruct | *TypeScript, Grunt, Docker, Bower, Karma*

- Data Structures and Algorithms for TypeScript
- Based on Java and C# Collections, and Google Guava

### FlightSearcher | *C#, ASP.NET MVC, TypeScript, React, Redux, Webpack*

- An application to search for flights based on airports and datetimes

### CheckOut | *C#, ASP.NET MVC, Docker*

- An API to manage a store inventory and allow customers to checkout items

## TECHNICAL SKILLS

---

**Languages:** TypeScript, JavaScript, C#, Python, HTML, CSS, SQL, C, Bash

**Frameworks:** Next.JS, React, Vue.js, Flask, Starlette, ASP.NET MVC

**Libraries:** TailwindCSS, PostCSS, pandas, NumPy, TensorFlow, ASP.NET MVC

**Databases:** PostgreSQL, MSSQL, MySQL, Elasticsearch

**Cloud Providers:** AWS, GCP, Azure, Vercel, DigitalOcean, Cloudflare (workers, CDN, DNS), Akamai

**Developer Tools:** VSCode, Visual Studio, Git, Docker, Kubernetes, yarn, npm, webpack, ESLint, Prettier, cmake, gcc
